Experience

Full Stack Developer at BeyondWill in Cincinnati, OH 🏢

Jan 2024 - March 2025

- Responsible for new development and ongoing maintenance of key frontend and backend product features, such as dynamic navigation and Data Vault
- Organized internal code review sessions with contract developers to ensure seamless product feature integration at a consistent 80% sprint completion rate
- Independently maintained ownership over company website, including development, testing, and integration with external services for marketing and CRM, ensuring daily deployable results with 99.9% uptime
- Led external QA sessions and end-user workshops with marketing and design teams to identify UI/UX improvements and feature priority, driving 85% user satisfaction and maintaining high product standards
- Optimized single-developer deployments by implementing Test Driven Development, database management, and comprehensive unit, integration tests

Information and Data Solutions Intern at Eli Lilly Corporation in Indianapolis, IN 💡

May 2023 - Aug 2023

- Coordinated with multiple stakeholder groups, vendor support teams, and business partners to determine and document pain points with current data staging-loading process
- Spearheaded backend RestAPI development for Release I of an internal web application designed to validate clinical trial datasets, creating a foundation that cut data staging time by 90% compared to existing IT processes

Front-end Developer Intern at Pieces.app in Cincinnati, OH 💻

Jan 2022 - Dec 2022

- Engineered and managed robust MVP front-end plugin features for the Pieces for Developers application, driving seamless integrations with leading software platforms like SublimeText and Slack.
- Collaborated closely with cross-functional teams – spanning integration, development, and design – consistently delivering new software features and achieving an exceptional 90% Agile sprint completion rate

Projects

Lead Developer - BeyondWill Domain Migration 🌐

Sept 2024

- Independently migrated company assets, including website and product, to a new Google Cloud domain
- Proactively introduced and formalized previously non-existent Disaster Recovery / Business Continuity procedures, including setting up data backup instances and creating new processes for regular testing
- Monitored site traffic and error logs through GCP to ensure highly reliable performance functionalities

Developer - BeyondWill Product Application Tech Stack Migration 🛠️

Apr 2024 - Sept 2024

- Evaluated and assessed previous product state with lead engineer to determine a strategic solution that more closely aligned with stakeholder goals, requirements, and timelines
- Ported previously-existing React/Go application to Ruby on Rails, merging frontend and backend repositories while prioritizing speed of release to deliver Market-Viable Product in 5 months

Education

Bachelors of Science in Software Engineering at Miami University 🎓

Aug 2019 - Dec 2023

- **Graduated Cum Laude**
- **Resident Assistant (RA)** for 2.5 years
- **Ronald and Mary Ann Kral Scholarship Award Recipient, 2021**
- **Co-President**, Miami University Badminton Club, leading and organizing club events
